EDUCATION

Mahatma Gandhi Mission's College of Engineering and Technology, Noida

Expected 2028

Bachelor of Technology in Computer Science Engineering CGPA: 8.0 / 10

3rd Year

EXPERIENCE

Software Engineer Intern

Apr 2026 – Present

Spaks Business Solutions Pvt. Ltd. — Built [elitesyatra.com](#), a production multi-tenant Travel SaaS

Delhi, India

- Architected a monorepo platform with **Next.js 16** (App Router) and **TypeScript/Express** API server, deployed on Vercel + Railway with custom domain and wildcard subdomain routing ([*.elitesyatra.com](#)).
- Integrated **TBO (Travel Botique Online) APIs** for real-time flight search, fare quoting, booking, and ticketing — completing the full certified 12-item API flow for flights and hotels.
- Designed **polyglot persistence**: PostgreSQL as the source of truth for financial transactions with MongoDB for application data, plus a background healing worker to resolve cross-database sync failures.
- Engineered a **two-tier markup engine** and multi-role auth (customer, agent, B2B agent, partner) with JWT and branded agent subdomains.
- Implemented **Razorpay payments** with webhook signature verification, idempotent processing, atomic refund guards, and a dead-letter queue for failed transactions.
- Built 6 typed Mongoose models with Cloudinary uploads, full CRUD, input validation, rate limiting, and paginated endpoints.

Full Stack Developer Intern

Feb 2026 – Apr 2026

Web3Task (MNC) — Contributed to [VoiceToNotes.ai](#), a production app serving 100K+ users

GTR Noida, India

- Shipped **localization (i18n, tolgee SDK)** and **push notification** features on the live production app, coordinating deployments with cross-functional engineering teams.
- Optimized static pages for **Core Web Vitals and SEO**, achieving ~30% faster load times across devices.
- Worked with structured Git workflows, code reviews, and sprint-based delivery using **Next.js** and **Firebase Studio**.

PROJECTS

Syranx — AI Conversational Platform

[Live Demo](#)

- Architected a full-stack AI chatbot with **persistent user memory** and thread-based conversation context using Node.js, Express, and MongoDB. Designed JWT-secured REST APIs and optimized schemas for cross-session chat history retrieval.

Roomora — Travel Destination Tracker

[Live Demo](#)

- Built a full-stack CRUD platform with authentication, authorization, and input validation using Node.js, Express, and MongoDB. Implemented centralized error handling and RBAC.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java (OOP, DSA)

Frontend: React.js, Next.js (App Router), Redux, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Auth, RBAC, MVC, Middleware, Client and Server Side Validation

Databases: MongoDB (Mongoose, Schema Design, Indexing), PostgreSQL

Architecture: Polyglot Persistence, Idempotent APIs, Webhook Processing, Rate Limiting, Payment Orchestration

Tools: Git, GitHub, Vercel, Railway, Postman, Firebase Studio, Cloudinary, Razorpay, Mapbox, Geoapify

LEADERSHIP & ACTIVITIES

Google Developer Group (On Campus) — Web Development Team Member

- Conducted 3 technical workshops on web development fundamentals for peer students.
- Part of the coding contest conducting and management team.

Hackathon Participant

- Participated in **5 hackathons**, building working prototypes in team environments under time constraints.
